List of Proprietary Substances and Nonfood Compounds

Authorized for use under USDA
Inspection and Grading Programs

Part II - Nonfood Compounds Used in the Plant Environment

LIST OF AUTHORIZED COMPOUNDS

(In the following list, compounds are arranged alphabetically
by trade name under the heading of the firm by which they are marketed)

Gayford Industries, Inc.
Energy Pin L2

Part II

List of Nonfood Compounds Used in the Plant Environment

Category Code Letters And Their Meanings

The permissible use for each authorized compound is designated by the following code letters, and conditions for use are restricted by the category in which it is placed.

NOTE: In several categories, reference is made to the need for rinsing with potable water. PAD accepts water used in federally inspected plants as being potable when such certification is made by State health agency authorities.

L2. Enzymatic compounds for use in sewage and/or drain lines.

Manufacturers must provide PAD with a record of salmonellae analysis for each lot of the finished enzymatic treatment proposed for sale to federally inspected meat and poultry plants. Testing must be performed by a qualified microbiologist.
